A cross-sectional diagram of a moisture absorption device. A large arrow on the left points to the right, labeled "MOISTURE" and "MOISTURE ABSORPTION". The device consists of a rectangular block (11) with a hatched pattern, a top layer (13), and a bottom layer (22). A central cavity (20) is formed by a U-shaped structure (18) and a top layer (21a, 21b). A small, textured, dome-shaped component (18) is positioned on top of the U-shaped structure. A downward arrow is shown below the device.
